
Rubber and Felt conveyor for Polishing machine

Advantages of silicone rubber conveyor belt:

- Good flatness
- Not easy to run off
- Long service life
- Fabric polishing effect is good

Applicable varieties: Woollen, plush, suede, garment fabric, blanket and so on

Performance features of felt conveyor:

1. Imported materials, high temperature 220°. If necessary, using special materials can withstand high temperature 300°-500°.
2. The felt sleeve contains high temperature thermal shrinkage base material. After high temperature heating and shaping, the felt sleeve will automatically shrink and form.
3. Humanized mechanism felt cover has smooth surface, uniform density, standard specifications, no different fuzz, good wear resistance and long service life.
