# High Quality Metallic Card Clothing For Textile Spinning Machines

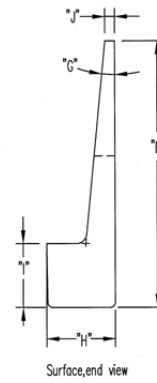

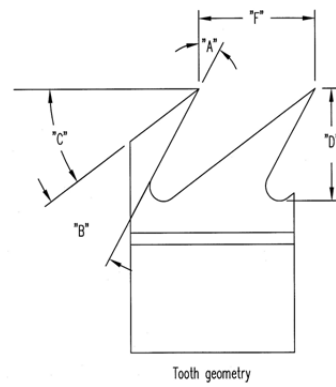

Advantage of our metallic card clothing:

- Made of long life alloy steel
- Hi tech punching technology, homogeneous tooth geometry with points and edges free of burrs and formed.
- High sharpness throughout the life span and carding performance
- Advanced hardening process to increase wear resistance
- Less blade thickness and lower tooth depth for better penetration
- Precision in manufacturing and perfect tooth geometries guarantee for reduction in naps and dirt particles.
- Improved wear resistance
- Sharp tips with high hardness

Card clothing types depend on various factor:

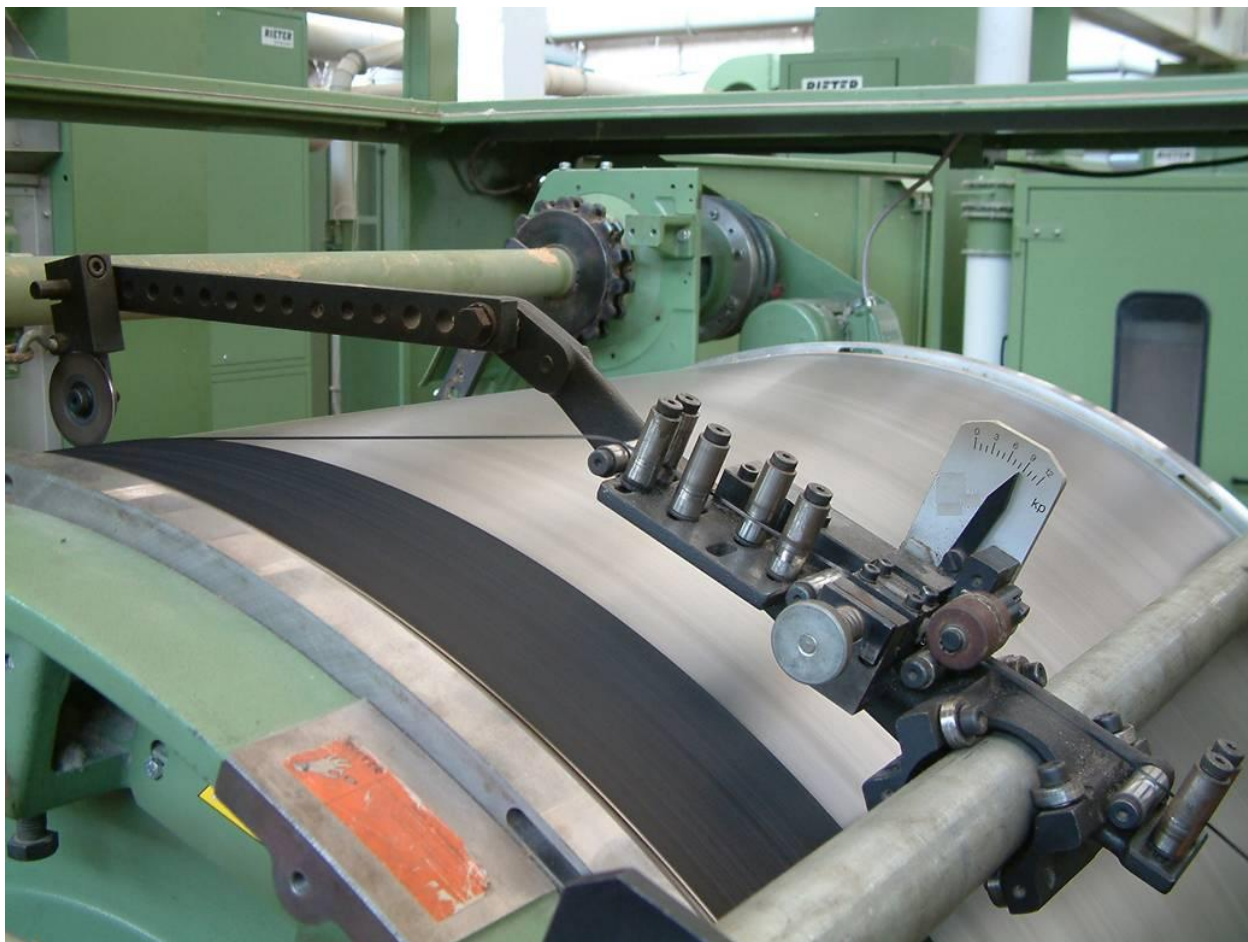

- Roller speed
- Customer quality level
- Gauge
- Fiber flux and airflow control
- Fiber variety and output

# MORE.....

- A=Front Angle
- B=Nip Angle
- C=Back Angle
- D=Tooth Depth
- E=Height
- F=Pitch
- G=Side angle
- H=RIB
- I=Rib thickness
- J=Pinpoint thickness

- Temperature and humidity
