

Spindles For Spinning Machine

Advantage Of Our Spindles For Spinning Machine:

Backed by the team of adroit professional and experience in this industry, we have emerged as one of the renowned suppliers and exporters of spindles. The entire gamut is manufactured in well equipped manufacturing unit by employing quality tested raw materials. Made from synthetic rubber, these roller coverings are abrasion resistant, highly durable and have excellent tensile strength. We offer these optimum quality spindles at very economical prices.

Specifications

Model	Dimension(mm)								Technical Parameter		
									Bearing		Speed
	H ₀	L ₀	L	L ₁	H	D	D ₁ ×T ₁	D ₂	Type	Inner Dia	(r/min)
D1201B	180	323	215	62.5	35	φ 24	4.15 × 0.042	16.34	DZ2	φ 7.8	8000–16000
D1201C	180	323	215	62.5	35	φ 22	4.15 × 0.042	16.34	DZ2A	φ 7.8	8000–16000
D1202B	180	341	233	62.5	35	φ 24	5 × 0.04	16.34	DZ2	φ 7.8	8000–16000
D1202C	180	341	233	62.5	35	φ 22	5 × 0.04	16.34	DZ2A	φ 7.8	8000–16000
D1203B	205	352.5	244.5	62.5	35	φ 24	6 × 0.055	16.94	DZ2	φ 7.8	8000–16000

DFG ₂ C	180	308.5	208.5	55	30	φ 20	4.15 × 0.0419	16.3	DZ2A	φ 7.8	8000–16000
DSG113	180	319	211	57.5	32	φ 20	4.15 × 0.042	16.34	DZ2A	φ 7.8	8000–15000

Features

The spindle is one of the main parts of the spinning machine to be wound. It is a combination of long and thin rotating shaft supported by two points. It is used to twist the fiber into yarn and wrap the yarn on the bobbin into a certain shape
