## High Quality Stenter machines

### Advantage Of Our High Quality Stenter machines:

Stenter machine is used in industry manufacturing stenter machine, stenter machine can be divided into shoe upper stenter machine, sock stenter machine, fabric stenter machine. The waste heat recovery of the molding machine is one of the main energy consuming equipment in the textile dyeing and finishing industry. The utility model relates to a device that uses hot air to dry, finish and shape the fabric. Hot air can be supplied in a variety of ways, can be directly in the machine combustion gas or light diesel, can also be heated with circulating heat conduction oil or steam, or electric heating.

#### Specifications

Will not finalize the cloth strip edge detector by the picture into the machine, the machine will automatically ends BuFu articulated on the needle plate, needle plate ends with the mechanical operation handle stride into the oven, oven by electric heating, fan drum wind, after a few different temperature of constant temperature oven, into the end after cooling to electrostatic, swing into the car, get a crisp, beautiful cloth.

#### Features

- This machine is suitable for all kinds of fabrics, knitted fabrics, woven fabrics, denim fabrics, etc.
- Steam humidification preshrink, can make the cloth feel good, soft luster.
- With less power consumption, save steam, stepless electric eye monitoring automatic release,
- Stepless speed regulation cloth and fold cloth, full steam preheating, no dripping point and other characteristics.
