
Horizontal Sueding Machines

Advantage Of Our Horizontal Sueding machines:

Main characteristics

- Patented grinding technology, brand new structure;
- Grinding of many styles, wider process range;
- Low energy cost, high efficiency and higher quality;
- Communication concentration line technology can display on line all equipment records;
- Concentrated dust arresting system can solve dust arresting problem for wide machine type;

Specifications

- Processing width:1800-3400mm
- Mechanical speed:5-45m/min
- Roller speed:100-1400r.p.m
- Installed power:84.2kw
- Control mode>manual control
- Combinations:2+2/3+2/6+4

Features

Applies to high-level arrangement and machining of woven fabrics, can realize quality of many types.
