
High Quality Oscillating Washing Machine

Advantage Of Our Oscillating washing machine:

Generally washing machine made by stainless steel drum, chassis, stents, frequency converter speed regulation, conveyor, conveyor roller, transmission parts, electrical parts, etc, and work through steam or electricity heat pipe heat the surface of the stainless steel drum, the conveyor belt transports the linen, bed sheet, bedding bag into the heated surface of the stainless steel drum, through high heat to achieve the effect of ironing.

Specifications

- Working width: 1800mm
- Type: 8 bowl + 8 squeezer
- Working speed: 8~32m/min.
- Inlet & outlet manner: open inlet, open storage
- Transmission manner: multi-unit AC convertor sync transmission
- Squeezer pressing manner: compressed air press, pressure 0.4 Mpa
- Heating source: steaming
- Installed power capacity: 28.2KW
- Outer dimensions: 21360x3490x3800mm

Features

This machine is mainly used for open washing, desizing, solid color, soft agent of silk, chemical fiber, synthetic fiber and other fabric after printing & steaming, especially good for printing washing desizing of cleaning effect of starch paste silk fabric. The design is reasonable, without any damage to the silk fabric.
